

TO:	All FTS Staff, Engineers, and Portal System Users	DATE:	28 September 2026
FROM:	IT & Cybersecurity Department	REF NO:	FTS-MEMO-2026-002
SUBJECT:	INFORMATION SECURITY POLICY: REMOTE ACCESS, MFA AND DATA CONFIDENTIALITY		

1. Objective & Security Mandate

To protect proprietary client blueprints, tender quotations, and financial transaction records against unauthorized access, phishing, and ransomware threats, Fire Technical Services has enacted strict cybersecurity standards effective immediately.

2. Mandatory IT Directives

- Multi-Factor Authentication (MFA): Mandatory two-step verification must be activated on all company email and portal accounts by the end of the current billing cycle.
- Authorized Devices Only: Off-site access to ERP records and engineering drawings is restricted to registered company laptops and managed mobile devices with encrypted storage.
- Strict Password Hygiene: Passwords must contain a minimum of 12 alphanumeric and special characters, changed every 90 days without repeating previous credentials.
- Zero Data Leakage: Exporting client lists, project drawing CAD files, or vendor pricing to unauthorized external drives or personal cloud accounts is strictly prohibited.

LEGAL NOTICE & MANDATORY DIGITAL ACKNOWLEDGMENT:

CONFIDENTIALITY & IT COMPLIANCE OBLIGATION: All portal users must read and digitally acknowledge this protocol. Non-compliance may lead to temporary suspension of system privileges and internal disciplinary review.
